Order & Workflow Management

Proactive Order Management

Provides a proactive window into the full order process, giving stakeholders transparency from purchase order through to invoice and resolution.

Workflow and Automation Tools

Enables task automation and approval routing for purchasing processes, reducing manual work and increasing operational efficiency.

End-to-End Procurement Management

Covers nearly all procurement stages, including sourcing, quoting, approvals, ordering, and reporting within one centralized platform.

Real-Time Order Tracking and Support

Keeps customers informed through shipment tracking, order updates, and real-time support to avoid delays and exceptions.

Supplier Engagement & E-Commerce

Effortless Electronic Marketing

Connects buyers to supplier content via hosted, punchout, or hybrid formats—streamlining discovery and enhancing procurement efficiency.

Flexible Supplier-Buyer Connections

Supports scalable supplier growth by offering a framework to onboard, transact, and build relationships with vendors.

Branded Communication

Includes branded Acknowledgements, Welcome Packs, and Notifications for better supplier and buyer experience.

Finance & Reporting Tools

Real-Time Reporting for Invoicing Accuracy

Provides real-time invoicing reports to spot irregularities and maintain audit-ready accuracy across the invoice lifecycle.

Continuous Improvement and Updates

Includes real-time updates and proactive improvements based on customer feedback and technology upgrades.

24/7 Accessibility

Grants access to procurement tools anytime, supporting decentralized teams across time zones.

Procurement-Centered Technology

Expertise-Driven Technology

Built from deep procurement knowledge, this solution reflects the nuances of buyer and supplier operations.

Seasoned E-Commerce Development

Tailored e-commerce development addresses the digital demands of institutional procurement.
